

## **Elite Mobile UK Now Supports Android Zero-Touch Enrolment**

*Elite Mobile UK devices can take advantage of Google's fast, simple, and secure deployment method.*

**15<sup>th</sup> July, 2021** — Elite Mobile UK today announced we are NOW an official device reseller partner for Android zero-touch enrolment.

This seamless and secure deployment method enables companies to pre-configure settings, management, and applications for their teams so devices are up and running right out of the box.

Devices purchased from our catalogue can be added to an organization's zero-touch enrolment account, making them ready for configuration for their enterprise deployment. Employees can just follow a few simple prompts and start using their device.

By adopting zero-touch enrolment, Elite Mobile UK are supporting a superior end-user experience for organizations, as this automated deployment method reduces the dependency on IT support and simplifies the delivery and activation process

By supporting zero-touch enrolment, Elite Mobile UK can help organizations realise several benefits:

- Quickly deploy a fleet of Android devices at scale with enforced management and security.
- Create device configurations in the cloud and have them automatically pushed to devices during setup.
- Directly assign devices to your organization for management.

For more information regarding Android Zero Touch please contact your account manager.
